

NZ IAS 39 has been replaced by NZ IFRS 9 Financial Instruments, except for (1) Insurance entities (2) Entities that continue to apply relevant hedge accounting guidance

Also refer: NZ IFRIC 9 *Reassessment of Embedded Derivatives*; NZ IFRIC 19 *Extinguishing Financial Liabilities with Equity Instruments*, NZ IFRIC 12 *Service Concession Arrangements*

## INITIAL RECOGNITION

Financial instruments are recognised on the Statement of Financial Position when the entity becomes party to the contractual provisions of the instrument.

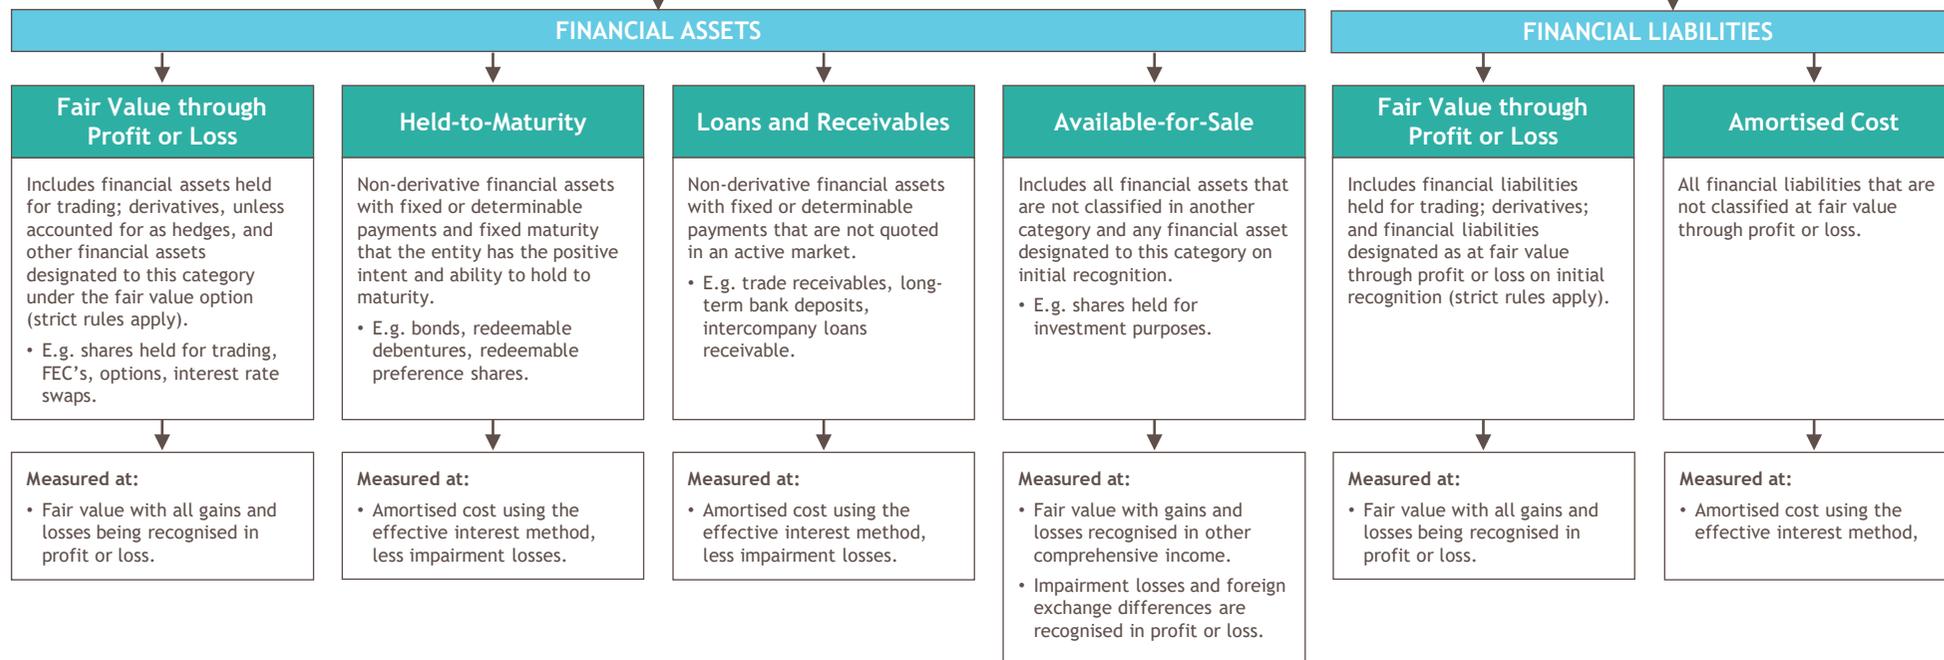

## INITIAL MEASUREMENT

All financial instruments are measured initially at fair value, directly attributable transaction costs are added to or deducted from the carrying value of those financial instruments that are not measured at fair value through profit or loss.

- **Fair value** - is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (see NZ IFRS 13 - *Fair Value Measurement*).
- **Directly attributable transaction costs** - incremental cost that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability.

## SUBSEQUENT MEASUREMENT

Subsequent measurement depends on the category into which the financial instrument is classified.

NZ IAS 39 has been replaced by NZ IFRS 9 Financial Instruments, except for (1) Insurance entities (2) Entities that continue to apply relevant hedge accounting guidance

## FINANCIAL GUARANTEE CONTRACTS

**Financial Guarantee Contract** - a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

## MEASUREMENT

- Initially measured at fair value plus directly attributable transaction costs.
- Subsequently measured at the higher of:
  - The amount determined in accordance with NZ IAS 37 - *Provisions, Contingent Liabilities and Contingent Assets*; and
  - The amount initially recognised less, when appropriate, cumulative amortisation recognised in accordance with the principles of NZ IFRS 15 *Revenue From Contracts With Customers*.

## IMPAIRMENT

Assess at each reporting date whether there is objective evidence that a financial asset (group of financial assets) is impaired. If there is evidence of impairment:

### Financial assets at amortised cost

- Amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted using the asset's original effective interest rate. Future credit losses that have not been incurred are excluded.
- The carrying amount of the asset is reduced either directly or through the use of an allowance account.
- The impairment loss is recognised in profit or loss.
- Reversals of impairment are recognised in profit or loss. Reversals cannot result in a carrying amount that exceeds what the amortised cost would have been had no impairment been recognised.

### Financial assets at cost

- Amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset.

### Available for sale financial assets

- When a decline in the fair value of the asset has been recognised directly in equity and there is objective evidence that the asset is impaired, the cumulative loss recognised directly in equity is removed from equity and recognised in profit or loss.
- Subsequent reversals of impairment losses recognised in profit or loss on equity instruments are recognised in OCI, not profit or loss.
- Subsequent reversals of impairment losses recognised in profit or loss on debt instruments are recognised in profit or loss.

## RECLASSIFICATION

### Financial instruments at fair value through profit or loss:

- Derivative financial instruments may not be reclassified out of this category while it is held or issued.
- Any financial instrument designated into this category on initial recognition may not be reclassified out of this category.
- May reclassify instruments that would have met the definition of loans and receivables out of this category to loans and receivables if the entity has the intention and ability to hold for the foreseeable future or until maturity. Any gain or loss already recognised in profit or loss is not reversed. The fair value on date of reclassification becomes the new cost or amortised cost.
- May reclassify instruments to held to maturity or available for sale in rare circumstances.
- May not reclassify a financial instrument into the fair value through profit or loss category after initial recognition.

### Held to maturity instruments:

- If no longer appropriate to classify investment as held to maturity, reclassify as available for sale and remeasure to fair value.
- Difference between carrying amount and fair value recognised in equity.
- Prohibited from classifying any instrument as HTM in the current and following two financial years.

### Available for sale instruments:

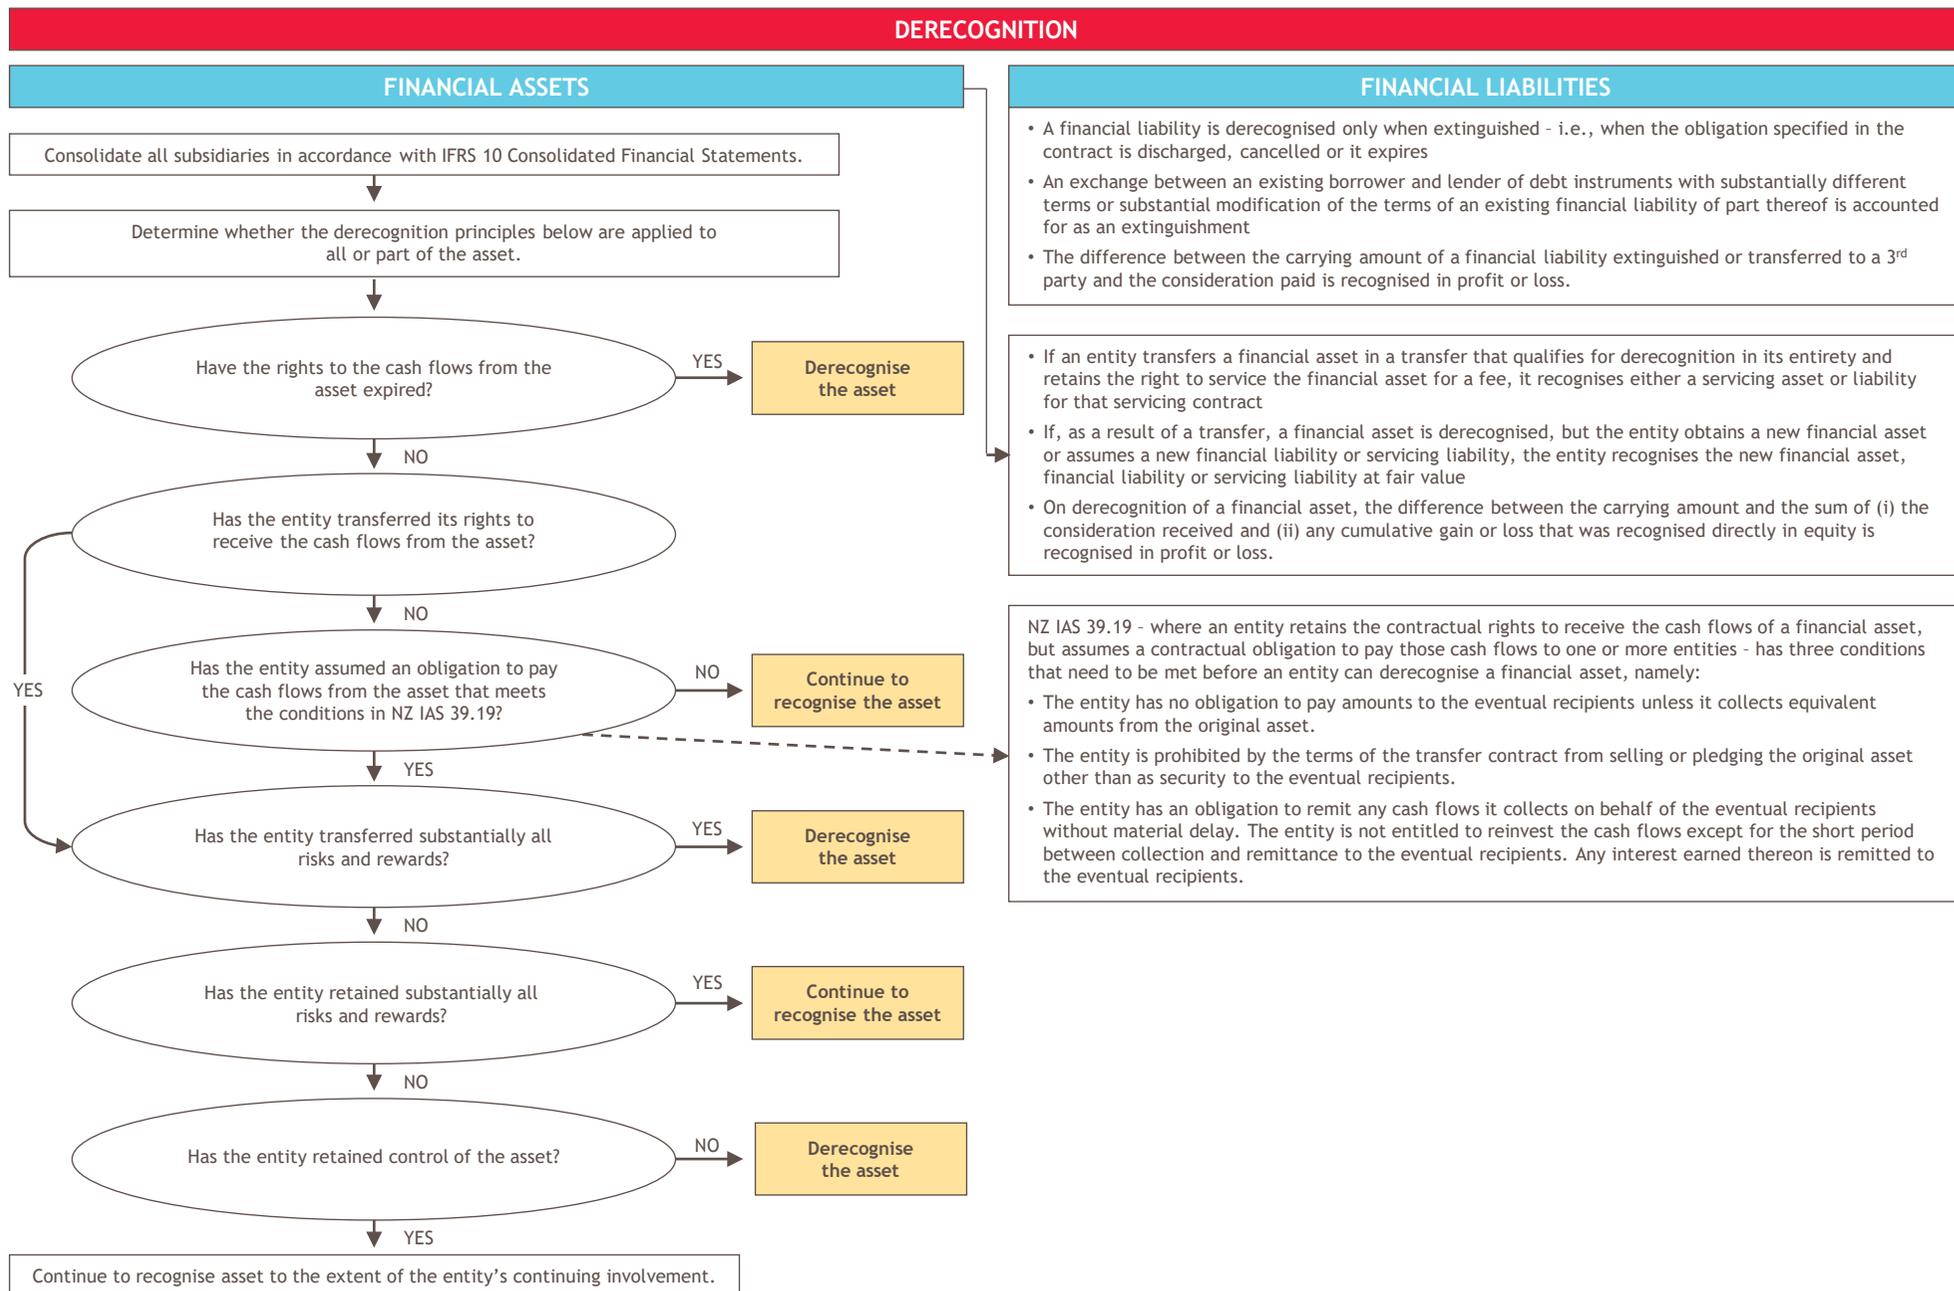

- May reclassify instruments that would have met the definition of loans and receivables out of this category to loans and receivables if the entity has the intention and ability to hold for the foreseeable future or until maturity.

### Financial instruments measured at cost as unable to reliably measure fair value:

- If a reliable measure becomes available for which a fair value measure was previously not available, the instrument is required to be measured at fair value.
- Difference between carrying amount and fair value recognised in equity for available for sale instruments.
- Difference between carrying amount and fair value recognised in profit or loss for financial instruments measured at fair value through profit or loss.

### Fair value measurement is no longer reliably measurable:

- If a financial instrument currently carried at fair value subsequently has to be carried at cost or amortised cost, because fair value is no longer reliably measurable, the fair value carrying amount at that date becomes the new cost or deemed cost.
- Prior gain/loss on financial asset with no fixed maturity recognised in equity remains in equity until the financial asset is derecognised at which time it is released to profit or loss.

## HEDGE ACCOUNTING

Hedge accounting may be applied if, and only if, all the following criteria are met:

- At the inception of the hedge there is formal designation and documentation of the hedging relationship and the entity's risk management objective and strategy for undertaking the hedge
- The hedge is expected to be highly effective (80 - 125 % effective) in achieving offsetting changes in fair value or cash flows attributable to the hedged risk, consistently with the originally documented risk management strategy for that particular hedging relationship
- For cash flow hedges, a forecast transaction that is the subject of the hedge must be highly probable and must present an exposure to variations in cash flows that could ultimately affect profit or loss
- The effectiveness of the hedge can be reliably measured, i.e., the fair value or cash flows of the hedged item that are attributable to the hedged risk and the fair value of the hedging instrument can be reliably measured
- The hedge is assessed on an ongoing basis and determined actually to have been highly effective throughout the financial reporting periods for which the hedge was designated.

### CASH FLOW HEDGE

- **Definition** - a hedge of the exposure to variability in cash flows that (i) is attributable to a particular risk associated with a recognised asset or liability (such as all or some future interest payments on variable rate debt) or a highly probable forecast transaction and (ii) could affect profit or loss.
- The portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognised in OCI; and the ineffective portion of the gain or loss on the hedging instrument is recognised in profit or loss.
- If the hedge results in the recognition of a financial asset or a financial liability, the associated gains or losses that were recognised in equity are reclassified from OCI to profit or loss as a reclassification adjustment in the same period(s) during which the asset acquired or liability assumed affects profit or loss.
- If the hedge results in the recognition of a non-financial asset or a non-financial liability, then the entity has an accounting policy election of either:
  - Reclassifying the associated gains and losses that were recognised in OCI to profit or loss as a reclassification adjustment in the same period or periods during which the asset acquired or liability assumed affects profit or loss (such as in the periods that depreciation expense or cost of sales is recognised; or
  - Removing the associated gains and losses that were recognised in OCI and includes them in the initial cost or other carrying amount of the asset or liability.
- Cash flow hedge accounting is discontinued prospectively if:
  - The hedging instrument expires or is sold, terminated or exercised (net amount recognised in OCI remains in equity until forecast transaction occurs and is then treated as described above).
  - The hedge no longer meets the criteria set out in the above block (net amount recognised in OCI remains in equity until forecast transaction occurs and is then treated as described above).
  - The forecast transaction is no longer expected to occur (net amount recognised in OCI is transferred immediately to profit or loss as a reclassification adjustment).
  - The entity revokes the designation (net amount recognised in OCI remains in equity until forecast transaction occurs and is then treated as described above).

### FAIR VALUE HEDGE

- **Definition** - a hedge of the exposure to changes in fair value of a recognised asset or liability or an unrecognised firm commitment, or an identified portion of such an asset, liability or firm commitment, that is attributable to a particular risk and could affect profit or loss.
- Gain/loss from remeasuring the hedging instrument at fair value or the foreign currency component of its carrying amount is recognised in profit or loss.
- The gain/loss on the hedged item attributable to the hedged risk adjusts the carrying amount of the hedged item and is recognised in profit or loss.
- Fair value hedge accounting is discontinued prospectively if:
  - The hedging instrument expires or is sold, terminated or exercised.
  - The hedge no longer meets the criteria set out in the above block.
  - The entity revokes the designation.
- Adjustments to the carrying amount of a hedged financial asset for which the effective interest rate is used are amortised to profit or loss. The adjustment is based on a recalculated effective interest rate at the date amortisation begins.

### NOVATION OF DERIVATIVES

- Hedge accounting continues for novated derivatives so long as:
- The novation is a consequence of laws or regulations (or the introduction of laws or regulations)
  - The parties to the hedging instrument agree that one or more clearing counterparties replace their original counterparty to become the new counterparty of each party.
  - Any changes to the hedging instrument are limited only to those that are necessary to effect such a replacement of the counterparty (including changes in the collateral requirements, rights to offset receivable and payable balances, charges levied).

### HEDGE OF A NET INVESTMENT IN A FOREIGN OPERATION

- Hedges of a net investment in a foreign operation, including a hedge of a monetary item that is accounted for as part of the net investment, are accounted for similarly to cash flow hedges:
- The portion of the gain or loss on the hedging instrument that is determined to be an effective hedge is recognised in equity; and
  - The ineffective portion is recognised in profit or loss.
- The gain or loss on the hedging instrument relating to the effective portion of the hedge that has been recognised in OCI is reclassified from equity to profit or loss as a reclassification adjustment on the disposal of the foreign operation.

### DESIGNATION OF NON-FINANCIAL ITEMS AS HEDGED ITEMS

- If the hedged item is a non-financial asset or non-financial liability, it is designated as a hedged item, either:
- For foreign currency risks, or
  - In its entirety for all risks, because of the difficulty of isolating and measuring the appropriate portion of the cash flows or fair value changes attributable to specific risks other than foreign currency risks.

NZ IAS 39 has been replaced by NZ IFRS 9 Financial Instruments, except for (1) Insurance entities (2) Entities that continue to apply relevant hedge accounting guidance

## INTEREST RATE BENCHMARK REFORM: AMENDMENTS TO IFRS 9, IAS 39 AND IFRS 7

In response to the uncertainty arising from the phasing out of Inter Bank Offered Rates (IBORs), the IASB has published Interest Rate Benchmark Reform: Amendments to NZ IFRS 9, NZ IAS 39 and NZ IFRS 7.

The amendments affect specific hedge accounting requirements in NZ IAS 39:

- When assessing whether a forecast transaction is highly probable or whether a hedged future cash flow is expected to occur assume that IBOR-based contractual terms are not altered as a result of IBOR Reform
- When making prospective effectiveness assessments (whether the hedge is expected to be highly effective) assume that the IBOR-based contractual cash flows from the hedging instrument and the hedged item are not altered as a result of IBOR Reform
- As long as a non-contractually specified IBOR risk component meets the separately identifiable requirement at inception of the hedge accounting relationship, hedge accounting should be continued.
- When assessing whether a hedge accounting relationship is retrospectively effective, relief from the 80 - 125% requirement during the period of uncertainty has been provided
- When an entity frequently resets a hedge accounting relationship in a macro hedge, the non-contractually specified IBOR risk component only needs to meet the separately identifiable requirement at the point the hedged item was initially designated within that hedge accounting relationship

The amendments are to be applied retrospectively for accounting periods beginning on or after 1 January 2020 with earlier application permitted. However, it is important to note that retrospective application in this context applies only to:

- Those hedge accounting relationships that existed at the beginning of the reporting period in which the amendments have first been applied (or were designated thereafter), and
- Amounts recognised in the cash flow hedge reserve that existed at the beginning of the reporting period in which the amendments have first been applied.

The amendments are limited in time until the uncertainty arising from interest rate benchmark reform is no longer present.
